

WELDKING STICK 160

inverter stick welder- combine portability and performance

Process:

Stick (SMAW)
TIG (GTAW)

Standard unit includes:

- Industrial power cord (10ft) and plug
- Work cable with clamp
- Electrode holder with cable

115/208/230V auto-switch!

WELDKING Stick 160 power source is built with state of art inverter technology, 115v/208v/230v auto-switch provides flexibility in wide range of applications.

160A output with 40% duty cycle give you access to use up to 3.2mm(1/8 inch) electrode without any problem(in 208/230V input)

Touch-start TIG permit TIG welding without HF start.

Built in Thermal and current overload protection guarantees long life of electronic parts inside the machine.

Light weight, rugged design makes Stick 160 a perfect selection for outdoor use. Stick 160 is your perfect selection for hobby welding, decoration, construction site and light fabrication.

SPECIFICATIONS

| Model | Stick 160 | |
|---------------------------|-------------|----------------|
| Power supply | 115V/60Hz | 208/230V/60Hz |
| Phase | 1 | 1 |
| Rated input (Kva) | 5.3 | 3.6 |
| Open circuit voltage (V) | 56 | 56 |
| Amperage range (A) | 20-120 | 20-160 |
| Rated welding voltage (V) | 26.4 | 26.4 |
| Duty cycle (%) | 40% at 120A | 40% at 160 Amp |
| Dimensions (HxWxD) (CM) | 30X15X37 | |
| Weight (KG) | 9 | |
