

WELDKING STICK 200

IGBT inverter stick welder- your reliable partner

Process:

Stick (SMAW)
TIG (GTAW)

Standard unit includes:

- Industrial power cord (10ft) and plug
- Work cable with clamp
- Electrode holder with cable

Option:

- Remote foot control pedal with cord length of 25ft(Order No. 07002305)

Built in arc force adjustment!

WELDKING Stick 200 inverter power source is built with state of the art IGBT technology, Build-in Arc Force control provides maximum stick performance either with E7018 low Hydrogen electrode or E6010 cellulose electrode.

Maximum 200A output with 60% duty cycle gives you access to use up to 4mm(1/6inch) electrode without any problem.

A optional sturdy foot remote control gives Stick 200 professional welding current control.

Touch-start TIG permit TIG welding without HF start.

With built in Auto Cable Length Compensation feature you can extend welding cable to maximum 100m without deteriorating arc performance.

Sturdy industrial design makes Stick 200 a perfect selection for outdoor use, especially construction site and fabrication applications.

SPECIFICATIONS

Model	Stick 200
Power supply	180v-265v self adaptable/60Hz
Phase	1
Rated input (Kva)	6.3
Open circuit voltage (V)	70
Amperage range (A)	20-200
Welding voltage (V)	20-28
Duty cycle (%)	60% at 200 Amp
Arc force adjustment (A)	0-100
Dimensions (HxWxD)(CM)	38x20x39
Weight (KG)	17.5
