

WELDKING TIG-200P

IGBT pulse DC TIG welder

www.weldking.ca

Process:

TIG(GTAW)
Pulsed TIG(GTAW-P)
Stick (SMAW)

Standard unit includes:

- Digital amp meter
- Industrial power cord (10ft) and plug
- Work cable with clamp
- Industrial standard TIG gun, 16ft

Option:

- Remote foot control pedal with cord length of 25ft (Order No. 07002305)

WELDKING TIG-200P is a DC pulsed TIG welder based in IGBT inverter technology. It is designed for sophisticated fabrication and critical maintenance work.

The DC pulse TIG-200P comes standard with hi-end features like HF start, pulse, current up/down slope timing, gas pre-flow and post-flow, make delicate faultless weld seam an easy job.

The DC pulse TIG-200P can also weld stick electrodes up to 5mm(1/5 in) with a stable arc and easy starting.

Portable and rugged design is ideal for harsh environment, both in shop and outdoor.

WELDKING pulse TIG-200P, your right choice for the success of your business!

SPECIFICATIONS

Model	DC pulse Tig 200P
Power supply	180v-265v self adaptable/60Hz
Phase	1
Rated input(KvA)	6.3
Open circuit voltage(V)	75
Amperage range(A)	TIG 5-200 with pulse
	MMA 180
Duty cycle (%)	60% at 200A
Current down slope time(s)	0.1-2
Gas pre-flow time(s)	0.2
Gas post-flow time(s)	0-5
Pulse frequency(Hz)	0.5-20
Dimension(HxWxD)(CM)	38X20X39
Weight(KG)	18
